Spring Boot Foundations: Expert Track

Actlea's most comprehensive Spring training from core to production.

DURATION	LEVEL	GROUP RATE
5 days	**Professional**	**On Request**

— CURRICULUM & HIGHLIGHTS

- Core Spring & Auto-config
- REST API Architecture
- Spring Data JPA & Hibernate
- Spring Security Foundations
- Production Ready Ops

The Spring Boot ecosystem is vast, and it's easy to get lost among thousands of modules. A true expert needs to understand how the core interacts with data layers, security, and external services to build reliable systems that last over time in a changing world today.

This flagship course provides a total walkthrough of the framework through Active Learning. Over five intensive days, we move from core concepts like DI and auto-configuration to complex Enterprise patterns in modern environments. The course combines REST, JPA, and Security in a cohesive pedagogical journey that makes participants production-ready immediately. You gain a deep understanding of how to orchestrate all parts of Spring to create high-performance, secure, and testable applications that meet the strict demands of modern software development here today.

TERMS
Price on request. Delivery available remote and onsite.

YOUR OUTCOME
A fully-fledged Spring expert ready to design large and complex systems today.

TARGET AUDIENCE
Teams wanting complete expert education in the entire Spring Boot ecosystem.

PREREQUISITES
Experience with Java programming. No prior Spring knowledge required for this.

RECOMMENDATION
After this foundation, you should specialize with our advanced AI workshops.
